

Testimony for HB 5303

To Whom it May Concern:

For the electronic record, I am writing to urge your support of HB 5303 - Emergency Medication for Children with Epilepsy. It is urgent that our legislators put the health and welfare of our children first. No form of political alignment or private interests related to this issue should take precedent over the well-being of a child with epilepsy. I personally have had direct experience with attempting to save the life of a person who had a sudden and violent epileptic seizure. It is terrifying, and deadly. Any and all efforts should be made to ensure a child who has a seizure has the chance to get medication immediately. In Conneticut, this means ensuring that HB5303 becomes a state law.

I urge your support of this important bill.

Sincerely,

Jennifer Johnson
